-Spring: CS 201 Data Structures and Algorithms, ECE 383 Microcomputers

EXTRACURRICULARS

Alabama Astrobotics
-Student design team with the purpose of designing and building a robot to compete in NASA's annual Robotic Mining Competition.
-Member of the software sub-team. The primary purpose of the software sub-team is to program the robot to traverse the arena autonomously.

Crimson Defense – UA Cyber Security Club
-Group meets once every other week to learn relevant cyber security topics through live technical demonstrations.

PROJECTS

Data Processing Project
-Group project to write the data processing software for a fictional organization called Chocoholics Anonymous. Made using Java.

Planner App Project
-Created a web application that takes in tasks with a due date and stores them in a database. Tasks can be edited, deleted, or marked complete, and the database is updated accordingly. Made using Django, Python, HTML, and CSS.

EXPERIENCE

Florence Harbor Marina Dockhand　　　　　　　　　　　　　　　　*(2018)*
-Responsible for filling up gas for customers.
-Performed various tasks, including things like pressure washing, painting, and organizing things.

SKILLS

-C++, C, Java, Python, JavaScript, HTML/CSS, Django
